

DIGITAL INDIA MAKE-a-THON

Date: 14th April 2017

Venue: 20 Block

Time: 4 pm

Introduction

TECHNOVATION bring this year's biggest and best hardware event at Lovely Professional University. It is a 24-hour hardware-oriented hack-a-thon where students come together to create something amazing!

Team specification

Team participation of maximum 4 members.

General Rules

- The Project must make use of development board capable of connecting to the Internet and transferring data to the Internet.
- All projects must use at least some piece of hardware, whether it is analog, embedded or mechanical (only use of smartphone app will not be counted, but a smartphone app instructing Raspberry Pi or Arduino to actuate a servo can be used; embedded software for Arduinos or other microcontrollers are also acceptable)
- Bring your laptops, any specific hardware components you were planning on using, as well as breadboard if required.
- This event encourages new ideas, and to implement it you have only 24 hours. For that reason, we encourage you to not work on an existing project and try something new.
- The various judging parameters will be the idea of the project, presentation, feasibility, innovative idea and the execution.
