Introduction: -

“Don't call it a dream, call it a plan”. From those greener thoughts with some high end skyscraper to those glittering field to colossal dams, all shows your potential to build a smart city. Township planning has always been a very significant aspect from an architect's point of view. It is a branch of civil engineering which in itself has got diverse facets of planning and utilizes one's innovative thinking. Good planning contributes greatly to the long term orderly growth and efficient use of land and services. Here, at TECHNOVATION, we provide you a platform where you can experience the idea of the forethought and explore yourself how good as town-planner you are!

DETAILS:-

1. The event is a township planning event.
2. Teams shall participate in teams, varying from 2 to 4 participants each.
3. The event will have only one round.
4. The participants have to plan a township within the restricted area that will be mentioned on the question statement.
5. All the teams will be given four hours for the completion of their respective plans.
6. Once the participants are done with the planning work they are supposed to describe their entire plan in writing, point wise, as briefly as possible.
8. All the teams are requested to bring their respective fabrication assets with them.

Note:

1. Rules of the event can be modified as per convenience at time of the event.
3. The exact date and timing will be texted/mailed to the participating teams few days prior to the competition.
