

VIRTUAL DRAFTER

Date: 14th April 2017

Venue: 55 Block

Time: 10 am

Introduction

This competition invites students to showcase their design skills on a challenging platform. The competition imparts the participant exposure on “real life” engineering design problems. It is intended to complement the academic curriculum, and the experience thus gained can be utilized by participants in their future projects.

Details

The participants will be given an entity which they need to draft in 2D on a grid sheet within a specified time limit, followed by designing it in any CAD software.

Team specification

Individual participation.

General rules

- Participants need to bring their personal stationery and designing kits.
- No alteration in the 2D drawing will be allowed after the specified time has been exhausted.
- The entity to be designed must be submitted to coordinator once you are done with your 2D drawing.
- Any proficiency software is allowed.
- Participants will have time constraint for drafting on the grid sheets as well as for the 3D design on software, which will be informed right at venue.
